

EXPOSE MENSHEVISM - PURGE OUR RANKS - ON TO PARTY-BUILDING - DEFEAT THE THEORY OF OVERCOMING OPPORTUNISM FROM WITHIN --- RWL

"The Bolsheviks have to lead the Party. In order to lead, you must know the path, you must stop vacillating, stop wasting time on convincing vacillators, on a fight within the faction against dissenters." (Lenin, The Liquidation of Liquidationism, Vol. 15, LCW)

Comrades, this is the clear and uncompromising direction of our great teacher, Lenin on the tasks of Bolsheviks in Russia during a period when the Party of the proletariat was divided into two factions, menshevik and Bolshevik. Within the Bolshevik faction itself, that of the genuine Marxist leaders of the working class, there developed a trend of "inside out menshevism," opportunists who sought also to liquidate the Party, having fundamental unity with the menshevik faction, a trojan horse, inside the faction of the genuine vanguard, a wolf in sheep's clothing in the ranks of the proletariat.

"In order to lead, you must stop vacillating." We believe that we can draw many important lessons from this teaching of Lenin. For in the U.S. anti-revisionist movement, we have seen the development of two wings, one revolutionary and one opportunist, one Bolshevik and one menshevik. Two wings determined not by hopes and dreams or masquerades, no, the two wings are determined by line, by the conformity of the ideological and political line with objective law.

In this period of "winning the advanced to Communism", the character of an organization's line can be seen in clear, bold print through analysis of its line on party building. For in this period, as Comrade Stalin points out, "the Party focused its attention and care upon itself, upon its own existence and preservation." (Party Before and After Taking Power, SCW, Vol. 5).

One of the hallmarks of the revolutionary wing is to consistently take all shades of differences, all struggles over line back to the two-line struggle on the central task; to analyze the development of the periods in the U.S. anti-revisionist movement in order to trace the development of the two-line struggle for the Party's line and program; to lay out the correct key link, principles, and tactics of party building leading up to the formation of the U.S. Bolshevik Party. And comrades, it is from this analysis of the class struggle for the Party that we gain a rational understanding of the objective fact of two wings, one serving the proletariat, and the other tied to the tail of the bourgeoisie.

"The Bolsheviks have to lead the Party." The revolutionary wing in the U.S. in unity with the international anti-revisionist communist movement, under the guidance of the Party of Labor of Albania, and the Chinese Communist Party, must come to the head of the movement, must take the lead in uniting Marxist-Leninist and winning the advanced to Communism.

We must shine the light of Marxism-Leninism-Mao Tse-Tung Thought (MLMTT) on our working class intelligentsia and independent leaders, our advanced workers, those forces who, in unity with Marxist-Leninists, will transform that light into a fiery red beacon, the Party, that vanguard of the proletariat and leader of all oppressed in the revolutionary struggle against the U.S. bourgeoisie.

HEIGHTEN THE STRUGGLE FOR THE BOLSHEVIK POLITICAL LINE!

What is that "path you must know", that key link in the chain? It is the hammering out of the Party's basic line and program of action. Our understanding of this key link has, as all knowledge, proceeded from a lower to a higher level, in the course of two-line struggle, in the fight against menshevism, which is crystallized in "build the mass movement, taking ideology and organization as the key links" in building the Party from below.

As we have struggled to develop the Party's line and program, we have been able to struggle against our own empirical deviations, see more clearly that the struggle for the Party's line has a long, deep history, that significant steps have already been taken in applying MLMTT to the concrete conditions of the U.S., that we weren't starting from scratch. We grasp more clearly the fact that political line is key link because objective necessity dictates it, and it is in our conscious struggle to deepen our grasp of this correct concrete analysis of concrete conditions

that we further distinguish genuine from sham.

We see more clearly our own incorrect line of the past of ideology is key link, and are much better armed to struggle with current deviations from the correct line.

And in the course of hammering out the line, we must take the lead in struggling against menshevism, against the bourgeois line of the anti-party opportunist wing; against its current leaders the OL and WVO; against the sham theorists, the lesser hegemonies of WC and MLOC who swing back and forth between the OL and WVO, even trying to claim unity with the line of the revolutionary wing; and against the fruit flies of the movement like IWK, CAP, Resistencia, who tail anyone that seems to be on the rise and where their careers can be best insured.

But, comrades we can not stop our struggle against menshevism here, with the opportunist wing. We must carry that struggle into the revolutionary wing, into our own ranks. The comrades from the PRRWO summed-up in the last issue of Palante (Vol. 6, #5), the tremendous victories achieved in the struggle against menshevism in its ranks, resulting in the purger of bourgeois agents, and greater consolidation of the entire revolutionary wing. The RWL has also been intensifying the internal struggle against menshevism, and has recently purged our ranks. The intensification of the struggle around the key link brought forth those opportunist within our ranks who held the menshevik line of ideology is the key link. As we began to intensify the struggle to draw sharper line of demarcation with the opportunist wing, these agents began to crawl out from their covers like rats from a burning building: The fire of class struggle was getting too hot.

These mensheviks seeing the cover of menshevik Mark Smith (bourgeois lackey to the bone now purged from RWL) ripped off by the rising tide of Bolshevism, tried to develop a better cover, tried to conceal themselves inside the revolutionary wing. This menshevik line in our ranks had two main exponents, Ron Washington and Nelson Johnson. These opportunists who were tailed by two isolated factions, could no longer divert attention from their own ugly faces by pointing to Mark Smith. In the struggle to hammer out the Party's line we have ripped-off their masks as well, drawn out the essence of their line, and see that it is no different from the general features of all menshevik lines.

The comrades in PRRWO summed-up "like in the first period of party building, in the second period where the menshevik line is even further revealed, these general characteristics must be drawn:

- Denial of the vanguard role of the proletariat in the revolution.
- Denial of the Universal truths of Marxism-Leninism, e.g. that the ideological root of all opportunism is the worship of spontaneity, this then resulting in:
 - A disdain for Marxist-Leninist theory and
 - A belittlement of the role of the conscious element, trying to divert at every turn the central task, party building.
- Attack of the fundamental Bolshevik principles of organization, democratic centralism and criticism and self criticism resulting in factionalism, conspiring, and intriging, wrecking, scheming.
- Disdain for the masses - crystallized in an attack on the advanced resulting in liquidation of factory nuclei
- Raising the "left" to cover the right - resulting in agitation as the chief form of activity, creating paper organizations tailing the union bureaucrats and revisionists, bowing to the backward stratas, pretending that we're in the transition period of winning the broad masses over; attacking the Bolsheviks as ultra-leftists and dogmatists, really attacking the quintessence of Marxism-Leninism".

Washington and Johnson and their faction, on each and every point, hold to these general features of the menshevik line. After tearing back these covers, the RWL has purged all these mensheviks from our ranks, and in unity with the entire revolutionary wing, has helped to beat back yet another bourgeois scheme to delay the proletariat's vanguard.

MLMTT
THOUGHT
W/ NO
MISTAKE

BOLSHEVIKS STAND FIRM! PURGE YOUR RANKS!

Comrades, the revolutionary wing has been greatly steeled in the struggle against menshevism, in the struggle to apply the teachings of MLMTT to the formation of the U.S. Bolshevik Party. The future is indeed bright! But our development has not been without errors, without deviations on line. (SEE LINES NOT NEARLY TO MY MIND)

"You must stop vacillating, stop wasting time on convincing the vascillators". The RWL has not correctly carried out these instructions from Lenin. We would now like to do self-criticism to all genuine Marxist-Leninists and advanced on our deviations of seeking to overcome opportunism within our ranks.

Comrade Stalin, in Foundations of Leninism, teaches, "the theory of "defeating" opportunist elements by ideological struggle within the Party, the theory of "overcoming" these elements within the confines of a single party, is a rotten and dangerous theory, which threatens to condemn the Party to paralysis and chronic infirmity, threatens to make the Party a prey to opportunism, threatens to leave the proletariat without a revolutionary party, threatens to deprive the proletariat of its main weapon in the fight against imperialism. Our party could not have emerged on the broad highway, it could not have seized power and organized the dictatorship of the proletariat, it could not have emerged victorious from the civil war, if it had within its ranks people like Martov and Dan, Potresov and Axelrod. Our party succeeded in achieving internal unity and unexampled cohesion of its ranks primarily because it was able to in good times to purge itself of the opportunist pollution, because it was able to rid its ranks of the liquidators and mensheviks... The party becomes strong by ridding itself of opportunist elements." (Foundations of Leninism- J.Stalin)

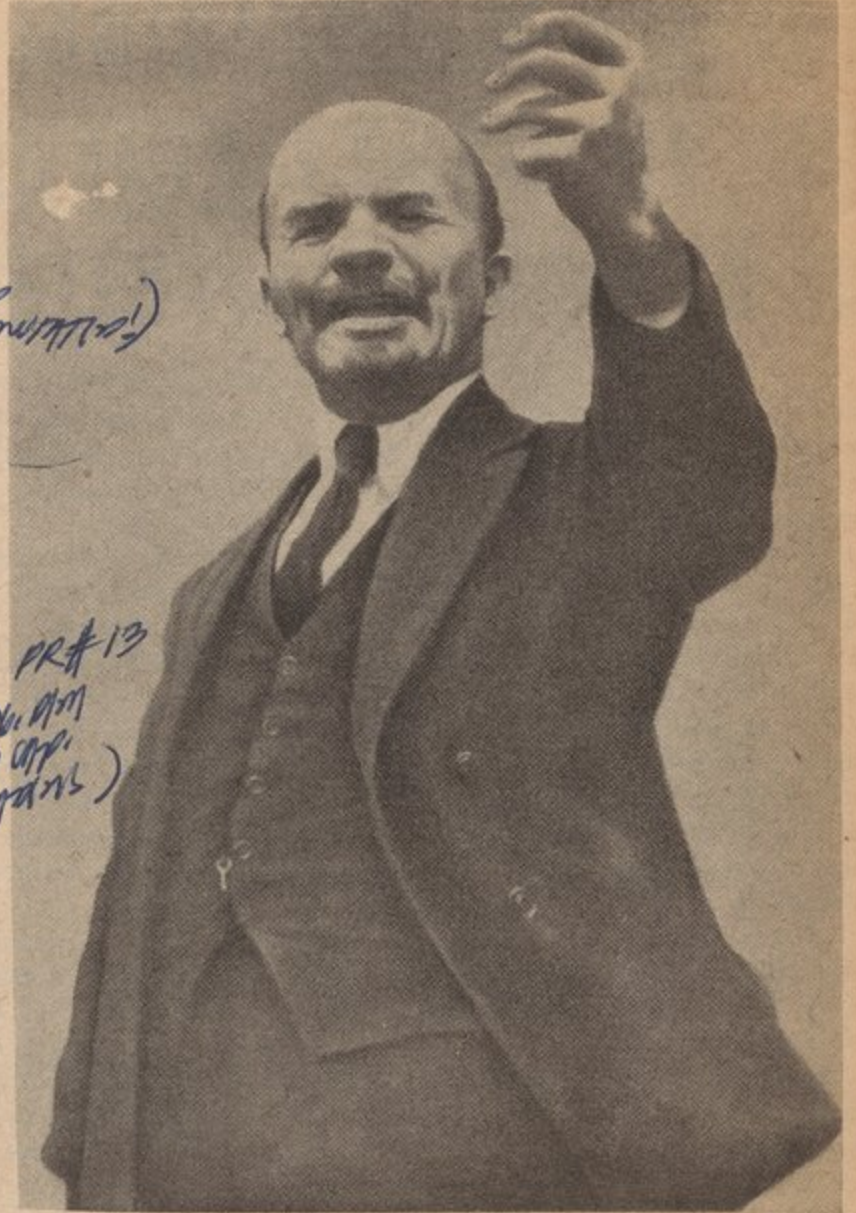

Comrades, Stalin's teachings ring loud and clear: Purge your ranks! We have applied this in our struggle inside the communist movement, correctly separating the bourgeois agents of the opportunist wing from the revolutionary wing, composed of the "Party's cadre coming into being." Within the revolutionary wing itself, we have also demonstrated our unity with the correct line by purging our ranks of the menshevik WVO, rendering them every assistance into the marsh. But when it came to purging the ranks of our own organization, here we vascillated, deviated from Lenin's teachings. We did not "in good time purge (ourselves) of opportunist pollution," instead we sought to "transform" opportunist elements within our ranks. What is this but the "Theory of overcoming opportunism within our ranks."

The basis of this incorrect line, as with all incorrect lines and practice, is the bowing to spontaneity. The ideological root of all opportunism. We incorrectly analyzed the relationship between the most immediate interest of the working class and the fundamental aim which is the armed seizure of power and the establishment of a socialist society under the dictatorship of the proletariat, led by its Party. The most immediate interest of the working class is the establishment of the U.S. Bolshevik Party, which can only be accomplished by firmly grasping the key link and hammering out the Party's basic line and program. Therefore, only those Marxist-Leninists who uphold a correct line on party-building, our central and only task, genuinely uphold the interest of the working class. What unity can we have with those element who uphold full systems of views which deny the general truths of Marxism-Leninism Mao Tse Tung Thought, deny the leading role of the working class and deny the key link, deny the existence of the advanced?

Whether inside or outside of our ranks, we stand opposed to Mensheviks, on every question in the struggle for a Bolshevik Party. We must purge ourselves of these elements who are objectively bourgeois agents within our midst. To attempt to "transform" these opportunists is to deny the line on party building as the basic line of demarcation between genuine Marxist-Leninist and opportunists. It starts not from the key link of political line but from the key link of the old period where upholding the general truths

was sufficient in drawing lines of demarcation ideologically, politically, and organizationally.

The incorrect line on handling opportunists in our ranks is rooted in spontaneity, taking the path of least resistance. It starts from the dominant line in the movement of ideology as the key link and build the party from below. Anyone who claim to be a Marxist-Leninist can remain in our ranks. Anyone who "promises" to subordinate themselves to democratic centralism can remain a member. "Uphold" the general truths, "subordinate" yourself to the organization and we'll overcome our differences and develop unity through common action.

Defeat Menshevism! Build a Party of Lenin

This is the theory of "transformation" at its essence. Can it be any clearer? There is the RU-OL-WVO party building line; there is not a shade of difference. The line of "overcoming opportunism within our ranks" is a line of conciliation, of building a party of Mensheviks and Bolsheviks. Failing to uphold the key link of political line in determining relations with internal mensheviks, we capitulate to the opportunist wing of the movement strengthening the ties that "bind the hidden traitors within the genuine wing to them," causing us to vascillate, waver and betray the class in an effort to "save" an individual.

The RWL did waver and failed to boldly complete the process we had begun. We identified the main exponents, drew lines of ideological and political demarcation and removed them from leading bodies. But there we stopped. We did not carry the organizational demarcation through to completion- Purge. We accepted their claims to be "Marxist-Leninist in general" and attempted to convince these opportunist that they were wrong for being opportunist. We also made the empirical deviation that "other comrades would be steeled in the struggle with the mensheviks." But Stalin and Lenin make it perfectly clear, internal mensheviks do not steel cadre, they demoralize; seek to confuse and destroy; they are nothing less than a corrosive acid eating away at our insides. It is true that we become steeled in struggle against opportunism, but there is a whole wing of opportunists in the movement which must be struggled with. But there are also opportunist lines within the revolutionary wing such as the "theory of overcoming" that must be rooted out.

In fact, as the teachers have pointed out, timely purge intensifies the struggle against opportunism. Ridding ourselves of opportunists elements enables us to better struggle against the bourgeoisie to better know our path, to devote more time to forming our party and to focus even more sharply on forging its political line and program.

STRENGTHEN OUR SOCIAL BASIS

How is it that the "theory of transformation" could take root in the RWL? As we stated in the Bolshevik #1 our organization is "mainly former students of working class and working people background and a few intellectuals".

We also pointed out that our life as students gave rise to apriorist deviations, to separating theory from practice. This is the error in the "overcoming" line, which is also a manifestation of the historical holding of ideology-organization as key link by RWL. The "theory of overcoming" belittles the key link of political line, the appli-

RWL con't from pg.4

cation of the general truths to concrete conditions, our guide to action. We focused on the claim to uphold the general truths, but we divorced this abstract claim from the opportunist line of these elements which revised the general truths and gave rise to anti-party practice.

In the course of sharp struggle, despite sophistry and conspiracy, we were able to break with the ideology-organization as key link line that had historically dominated the organization. But this break was not pure; we still held aspects of ideology as key which is concretized in the line "Marxist-Leninist unite is principle." This is a line of conciliation within the anti-revisionist communist movement which expressed itself inside the RWL through "peace not purge."

As to the mensheviks themselves, several of them had played an important role in the period when ideology was key, struggling against bourgeois nationalism. These mensheviks were in fact, part of the core of the leadership of the Youth Organization of Black Unity (YOBUB). They were seen as good comrades by many of us because of their role in the old period. But the fact is these mensheviks never united with political line as key link, just the opposite. They did all in their power to subvert the struggle for political line as key link, coming forward with ideology as key link, organization as key link, politics and organization as key, "build the party on the ideological plane" as key, study Marxism- Criticize revisionism as key; any and everything but political line as key link. But the fire was too hot, with every twist and turn, we waged class struggle, deepening our line on the central task.

We have been able to raise to a higher level our grasp of the correct line on the Leninist method of struggle. But our grasp did not come about peacefully, through asking "questions of clarification," through the gradual evolution of the correct line. No comrades, our grasp came in the course of class war against menshevism, through struggle to apply the correct line on party-building through the development of political line.

We did not deepen our grasp of the need to purge our ranks through turning inward, through petty bourgeois debate through "get-acquainted" sessions so popular among intellectuals in the old period and characteristic of the internal life of the opportunist wing. It was in the course of concretely applying the principles of "Marxist-Leninists Unite" and "Win the Advanced to Communism" that we saw our errors and rectified them.

FROM THE MASSES. TO THE MASSES.

BOLSHEVIK CRITICISM-BOLSHEVIK SELF-CRITICISM

We saw that we were in fact tailing behind the advanced on the question of purging our ranks. The advanced were staunch in criticizing the line that Smith was removed from leadership but not purged. They analyzed the line in Bolshevik #1 and participated in the polemic based on their understanding of MLMTT.

The advanced elements from the student-youth movement, like comrades from PRSU and FFM, aligning themselves with the line of the revolutionary wing correctly took the lead and purged from their own ranks, mensheviks, who had consistently sought to divert the advanced into the anti-party build the mass-movement line. Many comrades in ALSC are also uniting with the correct line, purging their ranks and preparing to drag all known and hidden mensheviks into the fire of Bolshevik criticism, chasing mensheviks such as CAP and RWC out of their ranks.

These criticisms and examples were a tremendous aid in showing that we were not fully carrying out our tasks of providing leadership to the advanced through correct line application; that, if we did not correct this error the advanced would sweep us to the side.

We also received clear sharp comradely criticism from genuine Marxist-Leninists especially the staunch Bolsheviks in the ranks of our organization and the comrades from PRRWO. As demonstrated in the May-June issue of Palante, the comrades have been exemplary in the application of the Leninist method, have once again purged their ranks of opportunist, reaching a higher level of Bolshevik unity. The comrades seeing the error we were making, raised firm Bolshevik criticism, helping to intensify our internal struggle by establishing correct external conditions. Where there is Bolshevik criticism there is Bolshevik self-criticism.

Within the RWL, new forces are rising up, being forged in the heat of class struggle. These forces criticized the line of the leadership concerning the menshevik Washington,

holding that he should be purged. These forces also took up the struggle against the Johnson faction, their menshevik line and splitist activity, leading the line that these agents be purged.

In all these struggles and criticisms from the genuine Marxist-Leninists and advanced, we can clearly see the growing party spirit, the growing principled unity, forged in the course of sharp two-line struggle that is further demarcating genuine from sham, yes comrades, Bolshevism is truly on the rise!

STATE OF SEIGE-HISTORIC CRY OF MENSHEVISM

Look at the menshevik wing and what lines do you see? From the WVO we hear that the revolutionary wing has a "philistine attitude towards struggle" because we purge our ranks. They've got to be kidding. They who have consistently run from struggle for the last four months, who use every diversion possible to avoid principled polemics, who need to purge their entire leadership, have the nerve to say that we're philistine. Oh no! No matter how much you might want to turn the world on its head or how hard you try, it is you WVO whose practice has proven to be philistine, who has proven to be riddled with some cadre who never made it out of the eclectic period.

From the OL and with MLOC in philistine agreement, we here the old cry of splitters and wreckers, that the revolutionary wing is sectarian and ultra-left because we won't unite. We say on what line? With genuine Marxist-Leninist and advanced, on correct proletarian political line and program, based on MLMTT, yes, of course we make every effort to unite here. With mensheviks, on political line rooted in metaphysics and idealism, in a party built from below, never. This cry of splitters is old as dirt; its the same menshevik cry of "State of seige", that they are under attack by the Bolsheviks. That line came forward in Lenin's time. Did Lenin accept the charge of being too hard in his polemics, did he unite with the plea to unite with the menshevik, to put differences aside and stop drawing line of demarcation? Did he? Absolutely not!

Check this out. The Party in Russia from 1903-1912 was divided into 2 factions. The communist movement in the U.S. is divided into two wings. We include the following quote to clarify for all honest forces why we polemicize "so bad" against the menshevik wing, why we won't unite with their schemes to form a party, why they are the real splitters. Check out Lenin's attitude toward the menshevik faction in 1907. "By my sharp and discourteous attacks on the mensheviks on the eve of the St. Petersburg elections, I actually succeeded in causing that section of the proletariat which trusts and follows the mensheviks to waver. That was my aim. That was my duty as a member of the St. Petersburg Social Democratic organization which was conducting a campaign for a Left Bloc; because, after the split, it was necessary, in order to conduct that campaign, to rout the ranks of the mensheviks who were leading the proletariat in the footsteps of the Cadet's (a Bourgeois Party, ed.), it was necessary to carry confusion into their ranks; it was necessary to arouse among the masses hatred, aversion and contempt for these people who had ceased to be members of a united party, had become political enemies, and were trying to put a spoke in the wheel of our Social-Democratic organizations in its election campaign. Against such political enemies I then conducted and in the event or a repetition or development of a split shall always conduct- a struggle of extermination." (LCW, Vol. 12, "Report to the 5th Congress of the RSDLP", emphasis in original).

Alright, OL, MLOC, WVO, and all other mensheviks why don't you come out and say it? Say it, Loud! Lenin was ultra-left. He suffered from "Hustlerism." But you can't do that can you, to do that would expose all the more that you are the ones who have split from MLMTT, that you seek to wreck the building of the Party through your attacks on the genuine wing and the advanced. Go ahead! Say out loud, that you want a party of mensheviks and Bolsheviks, that you have ceased to serve the proletariat and are seeking to build the mass movement in order to bargain with the bourgeoisie, to serve your own slimy selfish petty-bourgeois interest.

Yes, comrades. These growing attacks from the mensheviks is a clear sign that they, too, see Bolshevism on the rise. Some coming straight forward on the attack like the OL and WVO; others like MLOC through its guise of "unity", "questions of clarification" and insinuations all have one

con't on pg.8

of Leninism, which they long ago abandoned, again because they keep it in words never taking it to deed, sloganizing about the dialectical relationship between theory and practice but claiming that practice plays the principle role today in their deeds, in word saying theory is playing the principle role, as in deed they are building the mass movement. Check out their deeds. They claim they "unite" that without "revolutionary theory there cannot be any revolutionary movement", as Lenin taught us yet they say that to raise Marxism-Leninism to the masses obviously aimed at uniting all genuine Marxist-Leninists and winning the advanced, training party cadres, is dogmatic, and leftist, and isolationist and hustlerism. So what is Menshevism attacking and denouncing? Marxism-Leninism- Mao Tse Tung Thought - revolutionary theory- as clearly revealed in their attack of the method of Leninism.

The third point which Stalin sums up, in the Method of Leninism, is that "the whole work of the Party be reorganized along new revolutionary lines, with the view to educating and training the masses for the revolutionary struggle, for only in this way can the masses be prepared for the Proletarian Revolution.

So we go back to the beginning of this article, to prove once again how the Mensheviks and the bourgeoisie, its secret political police work together trying to subvert the hammering out of the Party's basic line and Program of action which must reflect that the Party is being built along new revolutionary lines, educating the masses in the spirit of party building. Application means winning the vanguard of the proletarians to the side of Communism with a view of educating the masses, i.e. build up cadres cadre training- what the Mensheviks have consistently failed to do, create a Communist Party- the Mensheviks building the mass movement- work out the Program - the Menshevik developing reformist programs for each mass movement, refusing to hammer out the Party's basic line which will be reflected in the Party's Program, as if the Program were just a matter of sitting down and putting down on paper some words without the class struggle, the struggle between the two line and two roads - without revolutionary deeds.

We apply Stalin's teachings, upholding the tactical principles of Marxist-Leninists Unite and Win the Advanced to Communism which the Mensheviks attack, attacking a conscious plan for the fusion of the communist and workers movements, it's highest expression being the Party.

The Revolutionary Wing has walked thru the polemic against the Menshevik line and will continue to do it in Palante, Bolshevik, Shop Newsletters, proving not just in words, but in deeds that we are carrying out propaganda as the chief form of activity. The Mensheviks attacking us for over emphasizing propaganda and being leftist when a summation of our errors reveal the right line of agitation chief form, a conciliation internally with the Menshevik line, and as we struggle to root out the Menshevik line on Party Building, intensifying the two line struggle, perging our ranks, repudiating the right line, correcting our mistakes. The method of rectification--more and better propaganda - as we carry on with all our work of Party Building as our central and only task

RWL con't from pg.7

common purpose-to make us waver, vascillate and conciliate; to get us to go easy on them, hoping to divert us from the correct path and drag us into the swamp, knowing that one day Bolshevik justice will make them pay for their crimes against the proletariat.

**CONCLUSION-BOLSHEVIKS STAND FIRM! KNOW THE PATH!
BUILD THE PARTY OF LENIN AND STALIN.**

Let us begin to conclude, by stating once again that revolution is the main trend, the future is bright, We call on all genuine Marxist-Leninists and advanced workers: Close our ranks; unite and struggle even harder to hammer out the political line and program of the Party. Struggle, expose and isolate the menshevik agents. Do not waver, do not vascillate, for that is the object of their bourgeois propaganda carried by rag sheets like the Call, Unite,

in this period, the period of formation of our Party.

TO BE ATTACKED BY THE ENEMY IS A GOOD THING

As we fight against any laxity in relation to carrying out our Central and only task, we are honored to know that in deed we are a threat to the bourgeoisie, to be attacked by the enemy is a good thing. The struggle for the Party, to build it firmly on Marxism-Leninism, grasping the key link Political line, uniting firmly on the analysis of the Revolutionary Wing of our movement, the Bolshevik line on the analysis of the communist movement, periods, fusion, key link, two tactical principles, fighting actively to defeat the right opportunist line on Party Building, and the right as the main danger we face in resolving and hammering the Party's basic line on all burning questions, the welding of the core, all this the work of Party building, makes the Revolutionary Wing of the movement the main target of attack from the bourgeoisie and their faithful partners the Mensheviks.

But we are preparing, by carrying on our task unseveringly, without hesitation, "no room for vacillators" saying to all the marsh - loud and clear - Let go of our hands, in this way we are preparing to withstand all attacks by the bourgeoisie.

Comrades, Menshevism is the main danger we face in the struggle for the Party and it has a long history. Lenin has given us an arsenal of experience on how we must never compromise to Menshevism. Yesterday the Mensheviks, said Lenin

"The Mensheviks betrayed the workers, went over to the cadets; and now their shady deal has failed, they want to clear themselves by merely talking about an independence social democratic action! But this is empty talk mere eyewah." Collected Works Vol. 12

Comrades, we know the Mensheviks will continue to slander and attack the Revolutionary Wing of our movement. A concrete manifestation of their attacks on the Party coming into being, strong, ready to lead new battles, new victories.

Comrades, study the Propaganda coming from Revolutionary Wing - In this issue of Palante check out Bolshevik example in the article by the comrades of RWL - Criticism and Self-Criticism and the struggle against opportunism internally. In the wing as a whole, fools, Menshevik fools, we're stronger than ever. Check out the development of the line - In the period of the Party's formation, the Party concentrates on itself.

Mensheviks dread it - Bolsheviks stand firm, Party Building is the Central and Only Task!

Down With Menshevism!
Bolshevism on the Rise!

Workers Viewpoint: do not falter from the path. We must wage ruthless struggle against the mensheviks who call us dogmatists for applying MLMTT to the concrete conditions of the U.S. revolution.

Learn from the international proletarian struggle against revisionism. We call on all those genuine Marxist-Leninists and advanced workers, our future Party cadre, to take up the directive of the CC of the CPC issued during the GPCR (Great Proletarian Cultural Revolution):

"What the Central Committee demands of the Party Committees at all levels is that they preserve in giving correct leadership, put daring above everything else, boldly arouse the masses, change the state of weakness and incompetency where it exists, encourage those comrades who have made mistakes but are willing to correct them to cast off their mental burdens and join in the struggle, and dismiss from their leading posts all those in authority who are taking the capitalist road and so make possible the recapture of the leadership for the proletarian revolutionaries."
(Decision of the CC of the CPC Concerning the GPCR)
