## DOWN WITH THE WARMONGERING U.S.-CHINA ALLIANCE!

On January 1 diplomatic relations were established between the governments of the U.S. and China. These relations were established to help in the development of the aggressive U.S.-China imperialist alliance. It is this reactionary alliance that is the issue. With this alliance the Carter administration is inaugurating the wholesale plunder of China by the U.S. monopolies and is "playing the Chinese card", that is, murderously instigating conflicts between the social-imperialists of China and those of the U.S.S.R. This alliance is aimed at world domination. The U.S.-China alliance is also a big part of Carter's "human rights" fraud, with which he is trying to prop up the sagging U.S. world empire, suppress the people's revolutions in blood and contend for world domination against the equally savage and imperialist alliances led by Soviet social-imperialism. Carter is cynically utilizing the Chinese revisionists for sabotage and subversion of the revolutionary movements all over the world.

The warmongering U.S.-China alliance is only possible because world capitalism has succeeded in corrupting the People's Republic of China from within with a new revisionist bourgeoisie. China is being placed under a new rule of the bourgeoisie. The Chinese revisionists are trampling into the mud the glorious revolutionary victories of the Chinese people, won at the cost of the blood of millions of martyrs. The revisionists are selling China to the highest bidder. At the same time as they subject the Chinese people to the slavery of the international monopolies, they are carrying out an imperialist, great-power chauvinist foreign policy. They are trying to carve out their own sphere of influence, while instigating war between their imperialist rivals.

The "new relationship" between the U.S. and China is not a "factor for peace" nor will it lessen international tension. On the contrary, it is part of the frenzied dance of the imperialist alliances. It is an alliance of imperialist exploiters and oppressors. This alliance exposes the warmongering essence behind both Carter's "human rights" fraud and the Chinese revisionist theory of "three worlds".

But the imperialists can never destroy the camp of socialism, national liberation and freedom. All over the world, the masses are rising in revolutionary struggle -- in Iran, in Nicaragua, in Spain, in the Resistance in Chile and in the strengthening of the Marxist-Leninist Parties the world over. Albania shines forth as the beacon of socialism. In the U.S. the revolutionary Marxist-Leninists are denouncing Carter's "human rights" fraud and exposing the "left"-wing of the imperialist "human rights" campaign, namely the fake Marxists who spout the chauvinist theory of "directing the main blow at Soviet social-imperialism". And the Chinese people will not accept the revisionist road. It is the revolutionary struggle of the world's people that stands against world war and that will smash the world system of imperialism.

### The "New Relationship" Between the U.S. and China Is Part of an Aggressive U.S.-China Alliance

With enormous fanfare the U.S. and Chinese governments have issued a joint communique and established diplomatic relations. Carter has invited Chinese Vice Premier Teng Hsiao-ping to Washington. These are no ordinary diplomatic events. No good can come of them whatsoever. These events are a milestone in the development of the aggressive U.S.-China alliance, a partnership in service of world reaction and aimed at world domination. In the name of the U.S. proletariat and people, *The Workers' Advocate* vigorously condemns the war-mongering Carter administration for this new act of imperialist intrigue and denounces the aggressive U.S.-China alliance.

In the past, before China embarked on the path of collaboration with imperialism, if the U.S. imperial-

ists had been forced to come to terms with the People's Republic of China, all progressive people would have welcomed it. It would have been a great humiliation of and setback for imperialism. But today it is neither a revolutionary nor an anti-imperialist nor a socialist China which is entering into deals with Carter, but a reactionary China ruled by a renegade bourgeois-revisionist clique. The Chinese revisionists, headed by Teng Hsiao-ping and Hua Kuo-feng, have completely betrayed the glorious cause of the revolution. They have become the biggest friends of imperialism, U.S.-led Western imperialism in particular, and the deadly enemies of peace, socialism, the world proletariat and the national liberation movement. The smiling fascist Carter is cynically utilizing his class brothers, the Chinese revisionists, to promote U.S. imperialist hegemony. It is in this light that the recent "diplomacy" between the U.S. and China must be assessed. We are in favor of the lessening of tension among

states and of normal peaceful relations between countries. However the "new relationship" between the U.S. imperialists and the Chinese social-imperialists is not designed to lessen tensions. On the contrary, it is an aggressive alliance that instigates war.

### Down with the Dance of the Imperialist Alliances

The U.S.-China alliance is part of the deadly dance of the imperialist alliances. Each of the imperialist powers strives to establish its own "sphere of influence", to carve out an area for its exclusive exploitation and to dominate as much of the world as it can. To pursue this aim, the imperialists combine and recombine into the various aggressive alliances whose aim is to drown the anti-imperialist struggle and the socialist proletariat in blood, to enslave the oppressed peoples and to fight over the booty with equally imperialist rivals. The particular alliances come and go, but the fact of imperialist aggression remains. The whirl of the imperialist alliances is a crime against the peoples, it is a deadly game of brinkmanship and of fomenting conflicts and bloodshed between countries. For this reason, the U.S.-China alliance must be firmly condemned.

The U.S. imperialists are hardened aggressors who are old hands at the bloody inter-imperialist rivalries. Today China too, guided by the rotten anti-Leninist theory of "three worlds", has joined the deadly whirl of imperialist alliances. Carter has welcomed the Chinese revisionists most warmly. Both Carter and Teng know that each is using the other, but imperialist alliances are not based on "true love", but on the most sordid interests of the moment, on cold-blooded calculation and on desperate gambles. The two superpowers, U.S. imperialism and Soviet social-imperialism, and the would-be superpower, Chinese revisionism, are all striving for world domination. Today China has formed its alliance with U.S. imperialism. Tomorrow, the Chinese revisionists will sit down with Carter and Brezhnev in summit conferences to divide up the world. The day after, who knows what alliances China will enter into, guided only by the unprincipled pursuit of a temporary advantage. As part of the so-called "realistic politics" of imperialist wheeling-and-dealing, the Chinese social-imperialists have found common cause with the biggest reactionaries, including the U.S. imperialists, the Japanese militarists and the German revanchists as well as the disgusting U.S. lackeys and hangmen like Pinochet of Chile, the Shah of Iran and other neo-colonial puppets. The Chinese revisionists have written off the socialist revolution and the national liberation movement. Instead they put all their faith in the maneuverings among the imperialists and in developing their own neo-colonial lackeys.

### The U.S.-China Alliance Is Aimed at Enslaving the World's People and Corrupting and Subverting the Revolutionary Movement in China and the U.S.

The U.S.-China alliance is based on protecting the positions of colonialism and neo-colonialism. Especially since World War II, the U.S. has taken up the

attempt to preserve colonial domination through the use of neo-colonialism. Through this means or that, by military alliances, control by the international monopolies, and the widespread use of the traitor classes of the big comprador bourgeoisie and the feudal landlords, the U.S. imperialists have maintained a whole system of totally enslaved so-called "independent" regimes. Some of these so-called "independent" regimes rank as the most fascist and medieval in the whole world. But this vast system of colonial slavery has been badly shaken by the national liberation movement. Who can forget the heroic struggle of the Indochinese people -- who persevered in the face of poison gas, bacteriological and chemical agents, fragmentation bombs and napalm, and defeated the U.S. aggressor armies. Today the struggles of the people in Iran, Nicaragua, Palestine, Chile, the Philippines and elsewhere are striking hard blows at U.S. imperialism. The U.S. empire is built on sand! The "human rights" demagoguery of the Carter administration is part of a desperate campaign to prettify and shore up the sagging rule of U.S. imperialism and occasionally to replace one discredited lackey with another one.

The Chinese revisionists have made it their mission to subvert the anti-imperialist revolution as part of the U.S.-China alliance. The theory of "three worlds" is especially designed to deny the national liberation movement. This theory even denies the existence of neo-colonies, and paints the attainment under the rule of the exploiting classes of formal political independence, the granting of pretty flags and postage stamps, as the end goal and highest achievement possible. After this is reached, the oppressed peoples are called on to simply produce more and more for the foreign imperialists and the domestic feudalists and big bourgeoisie. The Chinese news agencies are full of glowing reports of the extraction of more products from the neo-colonies, presenting this as a great victory of anti-imperialist struggle. The peoples are

## Socialism Marches Forward Triumphantly in Albania

Albania is the glorious homeland of socialism for the workers of all countries. The exploitation of man by man has been eliminated there with the overthrow of the capitalist system. There, genuine democracy exists and the people are truly the masters of their own country. Albania is not under anyone's thumb and it resolutely defends its hard-won national independence. The scientific principles of Marxism-Leninism are put into practice by the Albanian people

problems confronting the masses are insurmountable and only allow for some slight tinkering and adjustments by benevolent saviors such as Carter and other political swindlers. But the living reality of socialism in Albania is a bright beacon light that exposes the lies of the rich and illuminates the road forward for the workers and oppressed people of the U.S. and the whole world. Just look at some facts concerning Albania's socialist construction:

# The Anti-Leninist Theory of "Three Worlds" in Service to the Warmongering U.S.-China Alliance

The formation of the warmongering U.S.-China alliance is in complete accordance with and is the very fruit of the anti-Leninist theory of "three worlds". This so-called "great strategic concept" of the Chinese revisionists is being put into full effect by the Hua Kuo-feng-Teng Hsiao-ping clique. It is the "three worlds" theory which guides their efforts to turn China into a superpower and justifies their alliances with the biggest imperialists and reactionaries against peace, socialism and national liberation.

Chinese revisionism with its "three worlds" theory is but the latest current of modern revisionism. It is a variant of Khrushchovite revisionism, a gross concoction made up of the most outrageous distortions of Marxism-Leninism. Like all the previous revisionisms -- that of the American arch-revisionist Browder, Yugoslav Titoite revisionism, Khrushchovite Soviet revisionism, and "Eurocommunist" revisionism -- the "three worlds" theory is a flagrant renunciation of the revolution and is a line of open collaboration with imperialism, U.S. imperialism in particular.

Leninism teaches us that we still live in the era of imperialism and the proletarian revolution, the epoch of the victory of socialism over capitalism. In this era, two contending forces are locked in mortal combat, labor against capital, the forces of socialism and freedom against the forces of capitalism and slavery. Since the Russian Great October Socialist Revolution in 1917, the new socialist system has been in existence without interruption. Despite the restoration of capitalism in the U.S.S.R., at the hands of the Khrushchovite revisionists following the death of J. V. Stalin,

and despite the revisionist degeneration in China, genuine socialism continues to flourish in the People's Socialist Republic of Albania and socialism remains a powerful force. Nowhere on earth does the imperialist-capitalist system exist in peace and quiet, but everywhere it is in deep crisis, confronted by the forces of socialism, by the proletarian revolutionary movement and the anti-imperialist movement of the oppressed nations. Workers' strikes, demonstrations and protests, revolts, armed uprisings and national liberation wars of the oppressed masses are the order of the day. The problem of revolution is being taken up for solution in all countries. The two superpowers, the U.S. and the U.S.S.R., in the first place, along with the Chinese, Japanese and European imperialists, are involved in deep rivalries over the division of the loot plundered from the toilers on all continents. These conflicts are dangerous and lead in the direction of war, but at the same time they tremendously weaken the world imperialist system and provide prospects for the revolution to breach the imperialist front.

However, according to the opportunist ravings of the "three worlders", Leninism is no longer valid. Socialism, the working class movement and the national liberation movement and the very possibility of a successful revolution have all been written off as unfortunate misconceptions good only for a dim and distant past. The Chinese revisionists allege that the world is now divided in a different way -- according to geography: that the so-called "third world" (the capitalist and neo-colonial states of Asia, Africa and Latin America) "now constitutes the motive force pushing world history forward"; and that the so-called

"second world" (mainly the imperialist states of Europe and Japan) "can be won over to the third world in the common struggle against the hegemonism of the two superpowers", the U.S. and U.S.S.R.

Furthermore, the Chinese revisionists look at the world through big power spectacles and consider the re-division of imperialist spheres of influence and not the revolution as the cardinal problem of the time. The theoreticians of the "three worlds" theory in a warmongering fashion have proclaimed as "inevitable" a war between U.S. imperialism and Soviet social-imperialism. They have declared that the proletariat and people cannot prevent such a war and that the revolution has been indefinitely postponed. Hence, the only thing left to do is to support one superpower or the other in the inter-imperialist slaughter they are preparing.

Therefore, regarding the two superpowers themselves, the theory of "three worlds" does not treat them as two imperialisms, equally the most barbaric and savage enemies of the people of the world, but instead makes an absurd distinction between the two. Allegedly, U.S. imperialism is the "declining" superpower which has been placed "on the defensive" and therefore no longer an enemy but a bulwark of "peace" and "democracy" against the "one main enemy", the superpower "on the offensive," the Soviet New Tsars.

Thus, the "great strategic concept" of the Chinese revisionists is as far from the Marxist-Leninist class analysis as it could possibly be. Teng Hsiao-ping and Co. demand that the so-called "third world", (the U.S. neo-colonial puppets such as the Shah of Iran, Mobutu of the Congo (K) and Pinochet of Chile unite with

the imperialist and neo-colonialist states of the so-called "second world". Of course this "united front" is to be under the direction of the self-styled "leader of the third world", Chinese social-imperialism, which has its own neo-colonialist designs in this so-called "world". As well, it is demanded that the "third" and "second" worlds unite under the U.S. nuclear umbrella and be left to the tender mercies of U.S. imperialism. This line could not be more reactionary. There is no better formula for the defense of the status quo and for collaboration with imperialism, U.S. imperialism in particular than the theory of "three worlds". The formation of the aggressive U.S.-China alliance is the greatest achievement of the "three worlds" theory to date.

The disgusting spectacle of the counter-revolutionary U.S.-China collaboration demonstrates the enormous significance for the revolutionary Marxist-Leninists to fight with all their strength against revisionism and opportunism of all hues. To not fight the Pentagon-socialist "three worlders", the agents of Chinese revisionism in the U.S., is to take a non-revolutionary attitude towards U.S. monopoly capitalism and its state power. To fail to take an irreconcilable stand against the theory of "three worlds", to adopt it as one's own, means betrayal of the working class and going over to the side of world imperialism and reaction. Only by resolutely upholding the principles of Marxism-Leninism and proletarian internationalism, defending the immortal teachings of Marx, Engels, Lenin and Stalin against the distortions of the revisionists and opportunists of all hues, can the cause of the proletariat and working masses be advanced. End.

## U.S.-CHINA ALLIANCE

Continued from page 1

at most allowed to haggle for slightly better terms with the neo-colonialists at international conferences, provided that the proceeds are left to the exploiting classes.

Under the theory of "three worlds", the Chinese revisionists in fact call on the world's people to entirely give up the anti-imperialist struggle in any form and instead enter into imperialist alliances. This theory calls on the "third world" to unite with the so-called "second world", and especially with U.S.-led Western imperialism, with NATO and the Japanese imperialists, under the banner of struggle against the so-called "first world" (the two superpowers). Thus French neo-colonialism in Africa, British imperialism around the world, West German striving after its own areas of exploitation, are all presented in shining liberation colors, as the "second world" writing with the "third world". And indeed, these days the Chinese revisionists have given up all pretext of struggle against the "first world", and call for unity with one-half of the "first world", namely blood-thirsty U.S. imperialism, against the so-called "main enemy", the Soviet social-imperialists. No better formula could be given for the defense of U.S. imperialist aggression, and its exploitation and oppression of the peoples.

The U.S.-China alliance also aims at suppressing the American and Chinese people. Carter's "human rights" fraud and the Chinese revisionist "three worlds" theory are designed to corrupt the toiling masses at home, to subvert the people's movements and convert the masses into docile cannon-fodder for inter-imperialist rivalries. For this purpose, the U.S. big bourgeoisie is going into raptures over Chinese revisionism. The U.S. monopoly capitalist dictators realize that the "three worlds" theory is the best way to give a "left" or "Newman"-sounding cover to U.S. imperialist aggression, that it is a way to promote social-chauvinism, socialism in words but imperialist chauvinism in deeds. The Carter administration has endorsed the "three worlds" theory, while the universities teach it and fashionable "visitors" to China come back and give lectures on it. At the same time, the U.S. bourgeoisie goes all out to spread the pessimistic view that socialism no longer exists. The newspapers work overtime boasting about U.S. investments in China and crowding over it ultra-rightist views of the Chinese capitalist-readers in order to demoralize the revolutionary proletariat, to tell them that socialism is allegedly impossible. Meanwhile the Chinese revisionists are in a very difficult position and are not at all as skilled or popular as they present themselves to be. So in turn the Chinese revisionists are establishing a U.S. investments and are spreading U.S. ideological and cultural poison in order to prop themselves up against the Chinese masses. The U.S.-China alliance is thus aimed both at depicting the proletarian movement in the U.S. and spreading socialism in China.

## The U.S.-China Alliance is a Warmongering Alliance

The U.S.-China alliance is being advertised as a big victory for "the cause of peace in Asia and the world". However in reality the alliance is notable for its highlighting of international tensions and its direct instigation of war. It is not just an imperialist alliance in general, but a warmongering alliance.

The volatile and arbitrary nature of this alliance is quite obvious. Spinning about the recent library, Carter's national security advisor, Zbigniew Brzezinski admitted that "this was a strategic development in its own right". The top Pentagon generals including the Joint Chiefs of Staff also stated the "new relationship", pointing out that "on the strategic aspects it will enhance national security and the situation of American forces in the Western Pacific". The joint communiqué issued by the Chinese revisionists and the U.S. imperialists is also perfectly clear. It states: "Neither the U.S. or China-led, should seek hegemony in the Asia region or in any other region of the world and each is opposed to efforts by any other country or group of countries to establish such hegemony". This is an obvious reference to the U.S.-Japanese-Chinese bid for domination of Asia -- a

sort of Asian NATO -- and to inter-imperialist rivalry against the Soviet social-imperialists. Just so no one misses the point, the communique hypocritically adds "neither is prepared to... enter into agreements or understandings with the other directed at other states". Translated from the language of diplomacy, this means that both are aiming at agreements enslaving the whole Asian region and preparing for war against the Soviet social-imperialists.

The U.S.-China alliance is being justified as a "counterweight" to Soviet social-imperialism and as a "factor for peace". The most cynical warmongers are being portrayed as knights of "peace". Just as the war criminal Kissinger was awarded the Nobel Peace prize. Everyone knows that the Carter administration is arming frenziedly for war with record-breaking military budgets, while the Chinese revisionists are spurring on the arms race. The fact is that the only guarantee of peace possible is the non-stop development of the world revolution. It is the national liberation movements, the proletarian revolutionary movements, the socialist country Albania, and the just wars of national and social liberation that are the only defense against unjust wars of aggression and the only barrier against World War III. It is the weakening of the imperialist system that stays the hands of imperialism. The strengthening of U.S. imperialism as a "counterweight" to the Soviet Union, on the pretext of preserving the "balance" between the allegedly "declining" U.S. imperialism and the allegedly "rising" Soviet social-imperialism, is a warmonger's theory, a theory of imperialist brinkmanship. In fact it is the standard theory of the arms race, the theory of the "balance of terror" with which both superpowers always justify every new arms expenditure as being supposedly only what is necessary to preserve the balance with the competitor, or to have a bargaining chip available for SALT talks.

Today the U.S. imperialists and the Soviet social-imperialists, either taken separately or together, are equally the biggest enemies of the peoples of the world and the main source of a new world war. The American proletariat must fight the aggressive plots of U.S. imperialism tooth and nail. Thus the criminal declarations of the Chinese revisionists and their hang-on in favor of the faster rearming of the U.S. military with the most advanced and up-to-date means of mass murder -- including B-1 bombers and nuclear bombs, their calls for beefing up the U.S.-led NATO armies in Europe, are a further illustration of the warmongering nature of the U.S.-China alliance. These militarist cries prove that the proletariat must denounce the U.S.-China alliance in order to carry out the struggle against U.S. imperialism and imperialist war.

## The U.S.-China Alliance at Work in Asia

The slogans about the U.S. and China bringing "peace and security in Asia" are particularly obvious. It is the U.S. imperialists who have served the vast Asia from one end to the other with ferocious wars of aggression. It can hardly be forgotten that it was under the same false slogans of "peace and security in Asia" that U.S. imperialism carried out the most barbaric war of aggression in the history of mankind in Indochina. For over twenty years the U.S. aggressors waged war against heroic Vietnam, as well as annihilating atrocious aggression against Laos and Cambodia. Over five million U.S. troops, millions upon millions of millions of dollars of modern armaments including the most sophisticated weapons of mass slaughter, and the top Pentagon generals were dispatched to crown the liberation struggle of the Vietnamese and other Indochinese people in blood. The U.S. aggressor troops were only driven from Indochina three years ago, suffering complete defeat at the hands of the glorious unrelenting struggle of the Vietnamese, Cambodian and Laotian peoples who sacrificed millions of their lives and fightings on the battlefield.

Since the U.S. emerged as the leader of the imperialist camp following the Second World War, it has put enormous energies towards enslaving Asia with its huge population and abundant natural wealth. It was U.S. imperialism that armed the Chiang Kai-shek clique to the teeth for the slaughter of the Chinese people and that it is today arming the Chiang Kai-shek and military covering China's presence on Taiwan. It was U.S. imperialism which treated Korea and

carried out one of the most savage wars in history against the Korean and Chinese peoples, and to this day the U.S. troops are occupying the southern part of Korea. It is U.S. imperialism which has rigged up pro-U.S. fascist dictatorships in Indonesia, Thailand, the Philippines and elsewhere across Asia, slaughtering many hundreds of thousands of communists, workers, peasants and progressive people as in the fascist coup in Indonesia. The U.S. imperialists continue to encircle Asia with a string of military bases and ply the waters of the Western Pacific with the 7th Fleet and they do not do these things for the sake of "peace". U.S. aggression in China and Korea, in Vietnam and throughout Asia, has taught the world the profound lesson that all U.S. imperialism's talk of "peace and security", of "human rights", is just a cover for the most hideous barbarism.

It is not the U.S. imperialist warmongers who have changed and become a "factor for peace in Asia", but the Chinese revisionists who have become a supporter of imperialist aggression. For over thirty years the U.S. imperialists have tried to conquer China, by way of bloody wars and intervention. Now they have seized the fortress from within with the coming to power in China of the new revisionist bourgeoisie, the Teng Hsiao-ping-Hua Kuo-feng clique. When Teng Hsiao-ping went on tour of Southeast Asia, promising Chinese support for the bloodsoaked U.S. neo-colonial regimes in Thailand, Malaysia, etc., and calling for these pro-imperialist regimes to unite more closely inside ASEAN under the U.S. nuclear umbrella, he was strengthening the forces of aggression and war. When the Chinese revisionists instigate the fratricidal war between Cambodia and Vietnam and threaten the invasion of Vietnam, this is not in the interest of peace either. Recently Teng Hsiao-ping went to Japan, said "let bygones be bygones" to emperor Hirohito, who is dripping with the blood of millions of Chinese slaughtered during the Japanese invasion of China in World War II, and signed the "Treaty of Peace and Friendship" between revisionist China and militarist Japan. Japan itself is a guard dog of U.S. imperialism in Asia and a big imperialist power in its own right. The Chinese revisionists had sometime ago stopped warning the world about revived Japanese militarism and trying to drive Japan against the Soviet Union. With the treaty of alliance with Japan, a U.S.-Japan-Chinese axis began to take shape, an axis to dominate Asia.

The American aggression against Asia and the formation of the U.S.-Japan-China axis betrays the true aggressive face of the "new relationship" between the U.S. and China.

## A "New Relationship" to Serve the Plunder of China by the U.S. Monopolies

The U.S.-China alliance also includes the outright plunder of China by American monopoly capital. Under the pretext of "modernizing" the Chinese economy, Hua Kuo-feng and Teng Hsiao-ping are rapidly restor-

ing capitalism and opening China up as a field of investment for the international monopolies. The Chinese people who have shed rivers of blood to liberate their nation from the imperialist yoke are again being subject to a new imperialist slavery. The Chinese revisionist bourgeoisie is selling out the land and labor of China to the highest bidder among the imperialist monopolies of the West. Already the Japanese, German and other imperialists have begun operations in China. They have bought up entire sectors of Chinese oil and other natural resources. They have set up gigantic joint-stock companies for the exploitation of cheap Chinese labor. They have granted enslaving credits to the tune of tens of billions of dollars to the Chinese government. And it is not for socialism but for capitalism and maximum profits that such "aid" to China is being granted.

The U.S.-China alliance has been pulled from the financial houses of Wall Street to the banks of San Francisco. The "opening up of the vast Chinese market" to U.S. plunder is being billed as a veritable solution to the grave economic crisis of the U.S. monopoly capitalist system. The U.S. monopolies have feverishly watched the Japanese, German, French and other operations in China and are now scrambling to get a part of the action and to grab up their "share" of the Chinese market. Even, Mobil and the other imperialist oil monopolies are negotiating terms for the transfer of Chinese oil. General Motors and Ford are discussing the payments for auto assembly plants in Chinese cities. Various monopolies, from McDonald's restaurants to clothing manufacturers are being welcomed into China to exploit the workers and sell their goods. The Coca-Cola Company has already been guaranteed a monopoly on the Chinese market. The sell-out of the land and labor of the Chinese people by the Chinese revisionist traitors is completely shameless.

This sell-out is also reflected in the deal which has been struck in relation to Taiwan. Taiwan is an integral part of China which verily has been maintained as a U.S. imperialist colony, ruled by the puppet Chiang Kai-shek fascist clique. However, in return for their alliance with the U.S., Teng Hsiao-ping and Co. have promised Carter that China will not upset the status quo on Taiwan, that the U.S. investments there will not be touched and have even granted the U.S. permission to continue to supply the Chiang clique with "defensive" weapons.

Thus, the "common interests" which are part of the "new relationship" between the U.S. and China are the interests in the first place of the profits of the U.S. imperialist monopolies and the new Chinese bourgeoisie. The opening up of China to plunder by U.S. monopoly capital is a new crime against the Chinese people and a strengthening of the world system of imperialism. It must be resolutely condemned.

## Neither U.S. Imperialism Nor Soviet and Chinese Social-Imperialism Can Eliminate Socialism and the World Revolution

According to the imperialist propaganda mills and the sold-out "realistic politics" of the "three worlds" theory, the fate of mankind lies in the hands of the big imperialist powers. The imperialist strongholds justify their treason by holding that the entire world must be

## U.S.-CHINA ALLIANCE

Continued from page 2

subject to the dictation of one or the other of the imperialist powers or perhaps to several imperialists in combination. The imperialist gentlemen claim that the whole world must hold its breath while waiting for the outcome of SALT talks, for the decisions of the summit conferences of capitalist robbers, and for the disclosure of the dirty deals hatched in the secret diplomacy. The imperialists try to discredit the shining image and prestige of the revolution and to plunge the masses into pessimism and fatalism. Today with the U.S.-China alliance, the U.S. ruling circles are gloating about the elimination of socialism in China. The bourgeoisie is once again declaring the "finish" of socialism and the revolution.

But the truth is the direct opposite of the imperialist dreams. The entrance of China into the dance of imperialist alliances is a very dangerous thing, but it is only an adverse zigzag of world history. It cannot determine the inevitable outcome of the world proletarian socialist revolution. The fact is that socialism continues to exist, and not only in the aspirations and dreams of the working masses everywhere. Socialism is being built today in the People's Socialist Republic of Albania. Guided by the Marxist-Leninist line of the Party of Labor of Albania with Comrade Enver Hoxha at the head, the Albanian working class and people are successfully defending the dictatorship of the proletariat and are building a complete socialist society right in the face of the savage attacks and blockade of the imperialists and revisionists. The Chinese revisionists have only exposed themselves through their attacks on socialist Albania and their joining of the imperialist-revisionist blockade against her. Genuine socialism, the socialism of Marx, Engels, Lenin and Stalin, exist in Albania and remains the inevitable future of all mankind. Meanwhile the revolt of the proletariat is intensifying all over the world and becoming an ever more dangerous threat to the capitalist system. The anti-imperialist struggles of the oppressed nations are raging. Evidence of this is Iran where the U.S.-China alliance has utterly failed to suppress the Iranian masses who have risen up in their millions against the fascist Shah. Neither Hua Kuo-feng's recent visit of support for the fascist Shah nor the blessings via telegram of the "human rights" preacher Carter nor 50,000 U.S. military advisors have been able to put out the revolt of the Iranian people. The truth is that the world system of imperialism can never eliminate socialism nor quell the revolt of the proletariat and toiling masses.

## Down with the Aggressive U.S.-China Alliance!

The American people will never accept the U.S.-China alliance. All across the U.S. the proletariat looks with contempt at the imperialism and chauvinism of the U.S. monopoly capitalist dictators and at the antics of the Chinese revisionists. The people are inspired by the outbursts of revolution the world over, they stand up for Marxism-Leninism and the revolution, and they throw aside all that is dead and decaying and in league with the oppressors. The American revolutionary movement is rejecting with contempt the social-chauvinist theory of "three worlds". The American revolutionary movement has repeatedly demonstrated in the past its proletarian internationalist sentiment with the massive upsurge in the 60's in the struggle against the U.S. war of aggression in Viet Nam, with its support for the Chinese revolution, with its constant sympathy for any revolt against the U.S. imperialist empire and its historic support for the dictatorship of the proletariat wherever it existed.

The heroic Chinese proletariat and people too, who overthrew the Chinese emperors, who defeated the Axis-fascist Japanese invasion and then chased out the U.S.-backed fascist Chiang Kai-shek clique, will never accept the dark rule of the new revisionist emperors or submit to a new imperialist slavery. The interests of the Chinese people do not lie with the superpower ambitions of Hua Kuo-feng and Teng Hsiao-ping or in becoming cannon-fodder for the aggressive wars which the U.S.-China alliance is preparing.

The interests of the struggle against war, of the revolutionary movements for national liberation and of the proletarian revolution, the interests of the American and Chinese people and those of the entire world, all demand irreconcilable opposition to the warmongering U.S.-China alliance. The unity of the American and Chinese working class and people can only be achieved in the common struggle for the overthrow of the U.S. monopoly capitalist dictators, the Chinese revisionist bourgeoisie, and all reaction. It is the task of the American proletariat to lead all the toiling and oppressed masses in the U.S. in resolute condemnation of the warmongering policy of the Carter administration.

**DOWN WITH THE WARMONGERING U.S.-CHINA ALLIANCE!**

**DEATH TO U.S. IMPERIALISM!**

**DEATH TO CHINESE AND SOVIET SOCIAL-IMPERIALISM!**

**THE REVOLUTION WILL END THE DANCE OF THE IMPERIALIST ALLIANCES!**

End.
